

Aquilonis

Story

Aquilonis

- ❖ Founded in 2008 by Rahuldev Rajguru and Devang Thakkar with rich tech and management experience in mobility domain
- ❖ Bootstrapped and profitable operations with over dozen global customers from North America, China, Europe and India
- ❖ Sharp focus on enterprise mobility solutions that helps in employee productivity and real time data transactions
- ❖ Developed enterprise mobility platform that is agnostic to mobile OS, device and telecom operator

Why Aquilonis?

Aquilonis

- ❖ Mobile App Development – No rocket science – Many platforms
- ❖ App Management and business process mapping – the road less traveled
- ❖ Integrations Engine – built upon a decade of experience into enterprise mobile domain
- ❖ Close integration with Mobile Phone's native platform that blends with native UI – the aspect that is low prioritized in most of the mobile apps
- ❖ 100% cloud based integration with the existing Business App – the advantage is to integrate with multiple business apps to a single mobile app with only one middleware
- ❖ Granular architecture – platform is divided into multiple frameworks and libraries hence, reduces the overall footprint on the mobile device
- ❖ Operator Independent – customer can host within the existing infrastructure
- ❖ Data Integrity – zero data loss and secured transactions

Across Platform
